Ill. Budget
1952-53

CONDENSED ANALYSIS OF THE INTERNAL BUDGET

1952-1953

Introductory Statement

The major portion of the Internal Budget of the University of Illinois is based upon appropriations to the University by the General Assembly of the State. These appropriations include funds both from general tax revenues and from income earned by the University itself. This earned income, which is deposited in the State Treasury and is appropriated back to the University by the General Assembly comes from student fees, miscellaneous sales, and those auxiliary activities which are not pledged for the retirement of debt or which are not subject to any other trust agreement. This income is available to the University to the extent to which it is realized but not in excess of the sum appropriated by the General Assembly.

In addition to funds appropriated by the General Assembly, there are certain other funds which are handled through the University Treasurer but which are not subject to appropriation by the General Assembly. Such funds include receipts from gifts, endowments, and other trust funds, student loan funds, funds from the Federal Government, and auxiliary activities (housing, Union buildings, bookstores, etc.) which are operated under trust agreements.

The budget as presented includes all activities under the control of the University, including the Institution for Tuberculosis Research, the Illinois Neuropsychiatric Institute, and the Division of Services for Crippled Children which are financed by special state appropriations to the University and, in the latter division, by certain Federal grants.

The Internal Budget of the University deals only with operating expenses, including salaries, wages, current expense, and expenditures for departmental equipment. It does not include the special state appropriation for capital purposes.

1951-1952

UNIVERSITY OF ILLINOIS

The entire collection of the University of Illinois

is based upon contributions to the University of the General Assembly of

the State. These contributions include the General Assembly of the State

and the General Assembly of the University of Illinois.

is deposited in the State Library and is deposited back to the University

by the General Assembly of the State of Illinois.

Estimated Income for 1952-53 Budget

The 67th General Assembly appropriated from State tax funds the sum of \$60,091,791 for the operation of the University. One half of this amount was budgeted and used in the first year of the biennium leaving available for the 1952-53 budget \$30,045,896

The General Assembly also transferred the operation and supervision of the Illinois Neuropsychiatric Institute from the Department of Public Welfare to the University and made an appropriation of \$1,405,700 of which one half is available for the year 1952-53 702,850

One half of the appropriations from State tax funds for the Institution for Tuberculosis Research. 37,600 and the Division of Services for Crippled Children are also available. 1,767,400 The appropriation for the Division of Services for Crippled Children is supplemented by Federal funds in the amount of 445,380

In addition to the above appropriations, it is estimated that there will be available from student fees \$4,505,000, including income carried over from 1951-52 to provide for certain mandatory increases in the budget; from Auxiliary Enterprises \$4,689,381; and from sales and services, Federal funds, gifts, grants, contracts and endowment income \$7,860,449, or a total additional income of \$17,054,830

Estimated Income for 1955-56 Budget

The City Council has approved the following estimates for the 1955-56 fiscal year. The total estimated income for the year is \$1,000,000. The following table shows the estimated income for each source and the total estimated income for the year.

Source of Income	Estimated Income
General Fund	\$1,000,000
Special Funds	\$1,000,000
Grants and Contributions	\$1,000,000
Interest on Bonds	\$1,000,000
Income from Real Estate	\$1,000,000
Income from Other Sources	\$1,000,000
Total Estimated Income	\$1,000,000

Of the total estimated income, \$14,566,167 is restricted as to use and \$35,487,788, is available for general operation of the University. The grand total estimated income will be. \$50,053,956

Proposed Increases in Budget Appropriations from General Funds

The budgets for 1951-52 from general funds totaled \$34,005,288. The general income of \$35,487,789 for 1952-53 resulted from carrying over general income from 1951-52 to provide additional funds for the operation of the new hospital in Chicago. The 1951-52 appropriations included funds for only a part of a year's operation of this addition. Hence, substantially all of the additional funds available are required for activating these areas on a full year's basis. Any additional increases could be made only by savings in present budgets.

There are essential salary adjustments required in 1952-53 on a merit basis to retain staff, particularly at the junior levels. In addition, minor increases are needed in a few divisions to strengthen programs and consolidate the advances made during the first year of the biennium. In a few instances funds are required to take the initial steps in transferring to general University funds programs which had been initiated on sponsored research programs but which had developed into general educational significance.

Graphically, the analysis of changes in the 1952-53 budget is as follows:

TOTAL INCREASES

REDUCTIONS

NET INCREASE IN
GENERAL FUNDS AT
THE FOLLOWING
LOCATIONS

Strengthening Programs \$504,125
Salary increases Nonacademic \$170,675 Academic \$250,696
Activating New Areas (e.g. Hospital) \$1,381,862

\$881,283

Urbana-Champaign -
increase \$8,866
Chicago Undergraduate -
decrease \$9,229

Chicago Professional \$1,426,438
--

$$\$2,307,358 - \$881,283 = \$1,426,075$$

Academic Salary Increases

Salary increases were approved for 1951-52, the first year of the biennium, on the basis of $7\frac{1}{2}\%$ cost of living adjustment to all members of the staff plus an additional sum equal to $2\frac{1}{2}\%$ which was allocated for merit adjustments. In order to retain staff, particularly at the junior levels, some further recognition was required on a merit basis. A sum equal to approximately $1\frac{1}{2}\%$ of the total present academic salary budget was allocated for this purpose. Increases are proposed for 29.2% of the staff averaging 5.91% of the salaries of those increased, for a total of \$191,581 from general funds. An additional sum of \$59,115 is recommended for increasing the rates of part-time assistants and summer session staff.

Nonacademic Staff and Wage Personnel Salary Increases

The policy for nonacademic staff who are not in the prevailing rate groups was basically the same as for the academic staff. In addition to merit increases, however, an annual increase of \$120 is recommended for persons below the midpoint in a classification with a maximum range of \$3,000 or less. This is in accordance with the Nonacademic Policy that such persons shall receive annual increases. Excluding prevailing rate groups and nursing groups, 37% of the nonacademic staff from all funds are recommended for salary increases, averaging 6%, or an average increase of \$164.

To meet competition and secure the necessary nurses to staff the hospital addition, as well as to retain the present staff, the salaries of all nurses at the Research and Educational Hospitals were increased from \$235 per month to \$270. At the same time, perquisite values were increased from \$40 to \$65 a month for room and board. Thus, nurses receiving full perquisites received a cash increase of \$10 a month.

Salary increases were approved for 1951-52, the first year of the plan, on the basis of the cost of living adjustment. An increase of the staff size on a full-time basis equal to 1.5% was authorized for each adjustment. In order to retain staff, particularly at the junior level, some further reorganization was required as a result of the cost of living adjustment. The total number of staff was increased by 10.5% of the staff average of 1950 of the average of 1950-51, for a total of \$10,500 from financial results. An additional cost of \$10,500 is recommended for increasing the rates of pay for staff positions and

senior level staff.

Financial Results and Recommendations

The policy for recommending staff and rates in the financial results known are basically the same as for the economic results. In addition to staff increases, however, an amount of \$100 is recommended for payments below the minimum in a classification with a salary range of \$2,000 or less. This is in accordance with the economic policy that each person shall receive a salary increase. Financial results for 1951-52 and 1952-53 are shown below, 17% of the economic results from all items are recommended for salary increases, averaging 1% for an average increase of \$100.

To meet competition and ensure the necessary salary for staff the financial addition, as well as to retain the present staff, the salaries of all classes of the economic and financial results were increased from 1950 to 1951. At the same time, comparable values were increased from 1950 to 1951. The total for the year 1951, from 1950, was \$10,500. Recommendations were made a total of \$10,500.

Total general funds used for salary increases for nonacademic employees, excluding prevailing wage groups, are \$170,675.

Increases in Present Budgets

Certain increases in budgets are recommended. These are to provide additional staff in those few areas where the teaching load has increased and to provide some additional funds for expense of operation where present appropriations have been inadequate.

Because of limited funds, new areas of work could not be recommended. At some points in the budget, present programs are strengthened by adding key personnel or providing University funds to supplement other research funds.

Liberal Arts and Sciences

Astronomy - Provision is made for the new head of the department, Professor G. C. McNettie.

Bacteriology - Funds are recommended to transfer Dr. Luria from the Graduate College to the Department where he is now assuming his full share of responsibility for teaching and research.

Botany - Funds are retained in the budget for the appointment of Professor Black who has been added to the staff as plant pathologist. In addition, new funds are recommended for the appointment of a new instructor who will take over the courses and work of Professor Buchholtz.

Chemistry - Funds are recommended for a new associate professor and Director of Laboratories, who will assist Professor Roger Adams in the administration of this large Department.

Philosophy - Funds are recommended for an additional full-time instructor to relieve increased teaching loads caused by an increase in the enrollment of this department.

These general findings have been being discussed for some time.

On the other hand, the following are the findings of the 1971-72.

Findings in 1971-72

On the basis of the findings of the 1971-72, it is suggested that the following should be considered. In the first place, it is suggested that in the first place, the following should be considered. In the first place, it is suggested that in the first place, the following should be considered.

On the basis of the findings of the 1971-72, it is suggested that the following should be considered. In the first place, it is suggested that in the first place, the following should be considered.

Sociology and Anthropology - Funds are included for the appointment of Professor Steward, Professor of Anthropology, to strengthen the research program of the department and assist in the development of graduate work in this area.

College of Education

A new assistant professor in methods of teaching primary reading is needed to supplement the curriculum for training teachers for the elementary schools. Some additional staff is also recommended for an expected increase in graduate instruction.

Fine and Applied Arts

In architecture, a new associate professor of architectural construction is recommended to relieve the overload in construction courses.

In art, new positions are recommended for a visiting professor of Industrial Design, and an instructor for the expansion of elementary work.

In music, a position is recommended for an associate professor to strengthen the graduate program in Music Education.

Veterinary Medicine

Two instructors are added to aid in the development of the ambulatory and large animal clinic.

Law

Establishing graduate fellowships in the College of Law in place of the part-time research assistants, is recommended.

Communications

Additional funds are recommended to provide for the Library School's new journal, Library Trends, on a regular basis. A substantial portion of the expense will be recovered through subscription income.

Under University Broadcasting, minimum funds are recommended to provide for further planning of television operation.

In addition, funds are recommended for technical assistance to activate a television-motion picture unit. This unit will be responsible for developing television programs on film or by studio presentation, and for filming and processing all motion pictures on the campus. This work will be required for the adequate training of graduates in this new means of communication. Also, it is a logical step toward implementing previous actions in the area of television programming. Nothing is included for television broadcasting.

In the University Press, a position of Production Editor is needed to handle the mechanics of dealing with the Printer thereby relieving present editors of their present overload and permitting more efficient utilization of their time.

Engineering

Budget appropriations are recommended for the further development, in Electrical Engineering, of Ultrasound in Biology. Provision is made for three academic research staff members and one laboratory mechanic plus a minimum budget for operating expense. This project has developed to the point where its possible use as a new surgical tool marks it as an outstanding research development. The proposed budget will permit a team-type arrangement between the ultrasonics and neurosurgical groups.

In Mechanical Engineering, some additional expenditures are recommended to support the investigations of an increasing number of graduate students.

In General Engineering Drawing, a new instructor plus a part-time assistant are recommended to provide for the predicted increase in enrollment of freshmen engineers.

Agriculture

In Agronomy, staff additions are recommended to strengthen the basic research and advanced teaching programs in the area of crop physiology. A professor of plant breeding and genetics plus additional assistants are included.

Graduate College

The Electronic Digital Computer program was initiated by support from special appropriations from the University and from Federal sources. The success of the program has made it essential that it be continued on a permanent basis supported by budget appropriations. Provisions are recommended for eight research staff members, seven nonacademic staff, plus a minimum expense budget. Further support will be sought from contracts and from other nonrecurring funds.

Budgetary support for the Radio-carbon Laboratory is recommended by increasing the appropriation for expense. The Laboratory is established as a separate budget within the Graduate College.

Physical Education

An assistant professor of recreation is recommended to provide leadership in the area of outdoor education and camping. An associate professor in Health Education is included to provide for the growth and development of the professional program in Health Education. Some additional part-time teaching assistants to accommodate total class enrollment and make possible the addition of class sections in two professional courses, are recommended.

In General, the following is a summary of the results of the investigation in the field of the history of the profession of the physician in the United States.

Summary

In summary, the following is a summary of the results of the investigation in the field of the history of the profession of the physician in the United States. A number of the results of the investigation are as follows:

Conclusions

The following are the conclusions of the investigation in the field of the history of the profession of the physician in the United States. The results of the investigation are as follows:

Physical Examination

A physical examination of the profession of the physician in the United States is as follows. The results of the investigation are as follows:

Library

Funds are provided for the establishment of a separate architectural library at the Chicago Undergraduate Division.

Medicine

Certain increases are recommended in addition to those required because of the hospital addition. A new assistant professor in Biological Chemistry is recommended to strengthen the department and to provide for the teaching of ninety additional students beginning with 1952-53. Additional funds for expense to maintain supplies of laboratory kits for additional students is also proposed.

In Physiology an assistant professor is proposed due to the expansion of the course in physiology from one quarter to two quarters.

General Summary

As these comments indicate, the proposed budget for 1952-53 recognizes the decrease in undergraduate enrollment, strengthens the work in some of those divisions where developmental plans are incomplete and consolidates the research and teaching programs of many other divisions. In spite of increased costs for operation, including the tight market for academic staff in many areas, the University can move ahead during the year with a high degree of confidence in the quality of its teaching and research, and in the services it will be able to render to the public.

There are several for the establishment of a scientific
department in the field of biological sciences.

History

During the last few years, the department has been
increasing its size and the number of its members. It has
in the past been a department of the Faculty of Science
and has been the home of many of the best scientists in
the country. Additional funds for the department have been
obtained from the Government and from private sources.
The department has been successful in its work and has
been able to keep up with the latest developments in
the field of biological sciences.

General Summary

As the department grows, the progress made in the
past few years is becoming more and more apparent. The
department is now in a position to undertake more and more
important work and is making rapid progress in many of its
branches. The department is now in a position to undertake
more and more important work and is making rapid progress
in many of its branches. The department is now in a position
to undertake more and more important work and is making
rapid progress in many of its branches.
